

WINDOW TREATMENT

PRODUCT:

Hunter Douglas

Model: Duette® FR honeycomb shades

SPECIFICATIONS & FEATURES

- The unique cellular construction of Duette® FR honeycomb shades revolutionized window coverings with their superb durability, energy-efficiency, light-filtering, and clean aesthetics.
- standard headrail and sill rail both are exceptionally sturdy, featuring aluminum alloy 6063 (0.040" thickness).
- The rails and the crash-proof cordlock are fully color-coordinated to the shading fabric.
- opaque fabrics that highly resilient and comply with NFPA 701 flame-retardant requirements
- Highly energy-efficient cellular design has R value of 3.90, shading coefficient of 0.44

FINISH

- Daisy White

APPLICATIONS:

- Horizontal shades at window
- Vertical shades at sliding glass door
